Exemple

```
func testExample() {  
    let app = XCUIApplication()  
  
    // No identifier for a11y 😞  
    app.tabBars.buttons["Commande"].tap()  
  
    let buttons = app.tables.buttons  
  
    // Pick a coffee and change you mind! ☕  
    buttons.matching(identifier: "coffee-americano").element.tap()  
    buttons.matching(identifier: "coffee-espresso").element.tap()  
  
    // Add some 🍰  
    let bakeFld =  
        app.tables.textFields.matching(  
            identifier: "scone-fld").element  
    ...  
}
```
